

KENWOOD

*Turn your
stand mixer into*
SO MUCH MORE

Turn your mixer into *so much more* with a wide range of **ATTACHMENTS**

Kenwood is about helping you create more. A wide selection of attachments enables you to personalise your mixer to your needs. With three variable speed outlets, there's no task your stand mixer can't do - from a light and airy pavlova to that perfect homemade spaghetti.

The bowl tool outlet

The bowl tool outlet is positioned above the bowl for all your whisking, mixing, kneading, creaming or folding needs as well as all your ice cream and sorbet cravings.

Slow speed

The slow speed outlet is used for attachments that require power without the high speed, such as the pasta attachment.

High speed

For those jobs that need power blitzing, the high speed outlet is perfect. Used with the blender or food processor attachment, it's ideal for those silky smooth soups and slicing and dicing.

Scan to see the **full range** of attachments available for your Kenwood Chef.

Dial up the **SALSA** at your next dinner event

Make light work of food prep with Kenwood's Food Processor attachment. Chop meat, fish or vegetables. Six single slicing disks allow you to shred, slice, chop and rasp. Get those patés, dips and salsas on the table faster.
