

## FPM810 Citrus Juicer Attachment

Use the Citrus Juicer to squeeze the juice from citrus fruits (e.g. oranges, lemons, limes and grapefruits).

- a Cone
- b Sieve

### To Use the Citrus Juicer

- 1 Fit the bowl onto the power unit, add the detachable drive shaft.
  - 2 Fit the sieve into the bowl - ensuring the sieve handle is locked into position directly over the bowl handle.
  - 3 Place the cone over the drive shaft turning until it drops all the way down.
  - 4 Cut the fruit in half. Then switch onto speed 1-2 and press the fruit onto the cone.
- **The citrus juicer will not operate if the sieve is not locked correctly.**
  - For best results store and juice the fruit at room temperature and hand roll on a worktop before juicing.
  - To help with juice extraction move the fruit from side to side when juicing.
  - When juicing large quantities, empty the strainer regularly to prevent the build up of pulp and seeds.
